Towball download	Vehicle Mass
0kg	GVM** (All Variants)
100kg	Reduce vehicle mass to below GVM** by 130kg
200kg	Reduce vehicle mass to below GVM** by 280kg
300kg	Reduce vehicle mass to below GVM** by 410kg

If the laden vehicle's mass is reduced as shown in the tables, the towball download can be increased correspondingly. Accordingly, if the laden mass is 410kg less than the GVM**, a towball download of 300kg is approved. Different trailer types and different trailer manufacturers have varying towball downloads. The customer will need to contact the trailer manufacturer for information as to the download. Nissan is not able to make any recommendation on the use or suitability of load-levelling or weight distribution devices to be fitted to the vehicle. Customers should contact the manufacturers of these devices for further information.

** GVM = Gross Vehicle Mass. GVM is the maximum laden mass of a motor vehicle.

Tare mass = unladen mass of vehicle and 10 litres of fuel, excludes tray body for Cab Chassis vehicles.

* Indicates a premium paint, which is available at extra cost.

∞ Figures have been calculated in accordance with ADR81/02 (combined fuel consumption data). Actual fuel consumption will vary depending on driving conditions, driver behaviour, the condition of your vehicle and the accessories fitted.

† Towing capacity is subject to towbar/towball capacity and vehicle laden condition. The capacity may be reduced if a non genuine Nissan towbar is fitted. The permitted download is directly related to the laden mass of vehicle. The maximum towball download is 300kg (Diesel models).
