YARIS CROSS

TOYOTA

Move your world

Drive the **crossover life**

Nimble. Stylish. Surprisingly spacious and filled with advanced safety features to make every drive a delight. The hybrid technology makes the new Yaris Cross even more remarkable—and economical.

Are you ready to live the crossover life?

Stylish on the outside

The new Yaris Cross is lean, well-balanced and beautifully proportioned. It's also the perfect combination of SUV engineering and compact car design, with the elevated driving position you'd expect of an SUV, plus contrasting fenders and high-mounted headlights.

LED Daytime Running Lights

To ensure you're seen any time of day, the Yaris Cross comes complete with LED Daytime Running Lights. Bright enough to be visible, but not too bright to dazzle, these are a great safety addition.

Auto Folding Mirrors

To keep your wing mirrors safe when you're parked, the Yaris Cross automatically folds them flat when you lock the doors, then opens them out when you unlock—giving you added peace of mind—even in tight parking spaces.

16" Alloy Rims

These meticulously crafted rims elevate the Yaris Cross' appeal to a whole new level of excitement. With their polished and powerful aesthetic, they add to the dynamism of the Yaris Cross, giving it an exhilarating flourish and completing its sporty look.

YARIS CROSS

YARiS CROSS

YARIS CROSS

Auto Air-conditioning

Comfort is all around in the Yaris Cross. Set the Auto Air Conditioning to your chosen temperature and sensors will ensure it's maintained throughout the drive.

Electronic Parking Brake

Forget cumbersome pedals or levers. The Electronic Parking Brake in the Yaris Cross automatically engages when the gear is selected to "Park". It also has a Hold function, which can hold the car safely at traffic lights.

Fits **your life**

The new Yaris Cross is perfect for taking on the city streets during the week, just as it is prepared for the weekend. With a best-in-class boot space of 390 litres, it holds everything you need to pursue your hobbies.

Standard Mode

In standard mode, the Yaris Cross boot is already high and wide enough to swallow the week's shopping with ease. When the deck board is lowered, it creates a class-leading luggage capacity of 390 litres, which is the equivalent of two suitcases or two golf bags.

60:40 Mode

For even greater load-carrying flexibility, the seats can be folded in a 60:40 ratio, enabling you to carry passengers and larger loads in equal comfort.

Flat Mode

The rear seats can also be folded completely flat, for maximum carrying capacity and ease of loading.

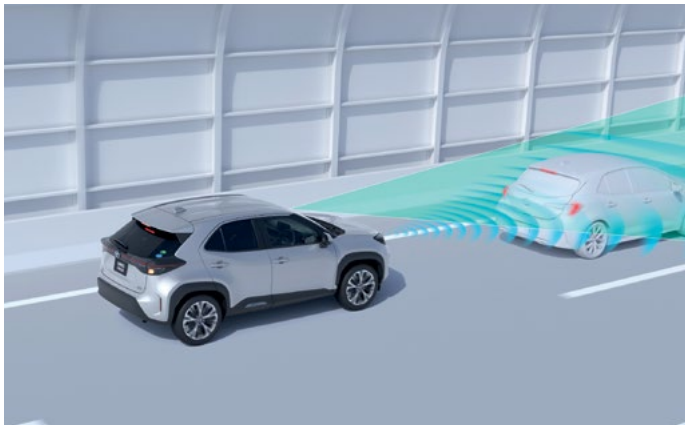

40:20:40 Mode

A first for a Toyota compact SUV, the 40:20:40 mode enables you to fold down a portion of the split rear seat, to enable you to accommodate longer items in the boot while still carrying two passengers comfortably in the back seats.

Keeping you **safe everywhere**

Toyota Safety Sense (TSS) is fitted as standard in the new Yaris Cross. This sophisticated suite of active safety features helps keep you, your passengers and other road users safe, making for a more relaxing journey every time.

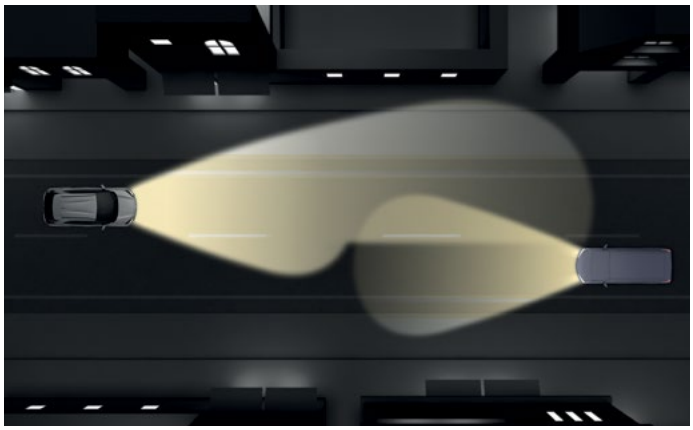

Dynamic Radar Cruise Control (DRCC)

Dynamic Radar Cruise Control takes cruising to the next level. Using forward-sensing radar technology and an intelligent camera, the system is designed to detect the speed and distance of the vehicle travelling directly ahead of you and adjust your speed accordingly. In heavy traffic, it maintains a pre-set following distance, slowing when it shortens and accelerating back to your original cruising speed when the road clears.

Lane Departure Alert (LDA) and Lane Tracing Assist (LTA)

The Lane Departure Alert system identifies visible lane markings and detects an inadvertent lane departure. It will then issue both an audible alert and visual warning on the Multi-Information Display (MID) screen. If the system determines that the driver is not taking corrective steering action, the Steering Assist function is designed to initiate and provide gentle corrective steering to help your car stay in the lane. When Dynamic Radar Cruise Control (DRCC) is enabled and lane markers are visible, Lane Tracing Assist (LTA) uses the lines on the road and the vehicles ahead of you to help keep the car centred and in its lane.

Automatic High Beam (AHB)

This smart sensor detects the headlights and taillights of cars in front of you, and switches automatically between high and low beams so you don't dazzle other drivers, making it safer for everyone.

Pre-Collision System (PCS)

This integrated camera and radar system is designed to help reduce the likelihood of colliding with a car or pedestrian in front of you. Should a frontal collision be imminent PCS will warn you to take evasive action and provide additional assistance if you do not brake in time.

Additional
Safety Features

Blind Spot Monitor

The Yaris Cross' Blind Spot Monitor alerts you to the presence of vehicles that may have entered the blind spot on either side of the vehicle, helping to make lane changes safer.

Parking support brake (PKSB) with Front & Rear Parking Sonar

The Yaris Cross audibly warns you when front and rear sensors detect stationary objects. If the system determines there may be contact, it will send an alert inside the vehicle and apply brakes.

Toyota **Hybrid Electric** Vehicle

The remarkable 1.5-litre Dynamic Force Engine that powers the new Yaris Cross is a self-charging hybrid unit that achieves outstanding fuel economy for its class at 4.8l/100km, easily surpassing the typical efficiency of an SUV.

Self-Charging Hybrid

The Yaris Cross features a self-charging hybrid system, harnessing energy from braking and deceleration to charge the battery, ensuring a continuous and efficient power supply without the need for external charging.

Seamless Acceleration

Stop-start traffic is never bringing you down when every start is a smooth one as you can take off instantly, even from rest.

Exceptional Fuel Efficiency

With its impressive fuel efficiency of 4.8L/100km, the Yaris Cross sets the standard for eco-friendly cars, making it a cost-effective and sustainable choice in every drive.

Lower CO_2 Emission

The Yaris Cross is designed for the eco-conscious driver with its lower CO_2 emissions, contributing to cleaner air and reduced environmental impact—making it ideal for those who value sustainability.

Exceptionally Quiet

Thanks to its hybrid drivetrain, the Yaris Cross offers an exceptionally quiet driving experience, minimising noise and vibration for a serene and enjoyable ride.

No Added Maintenance

The Yaris Cross requires no additional maintenance for its hybrid battery, providing peace of mind and hassle-free ownership while enjoying the benefits of hybrid technology.

Specifications & Features

DIMENSIONS AND WEIGHTS		Yaris Cross
Length / Width / Height	mm	4,180 / 1,765 / 1,590
Wheelbase	mm	2,560
Min. Turning Radius	m	5.3
Kerb Weight	kg	1,190
Boot Space	litres	390

ENGINE, MOTOR AND TRANSMISSION		
HYBRID VEHICLE SYSTEM		
Max. Output	kW (hp)	82 (110)
